EDUCATION

University of Rochester, Simon Business School

Rochester, New York

Master of Business Administration (STEM) – Strategy & Technology

May 2026

- Merit Scholarship Recipient, Beta Gamma Sigma Honoree, GPA: 3.76/4.0
- Leadership: Data Analytics Club - VP of Marketing, Net Impact Club - VP of Finance

Indian Institute of Space Science and Technology

Kerala, India

Bachelor of Technology - Physical Sciences

May 2017

- Department of Space Merit Scholarship Recipient, GPA: 7.62/10

PROFESSIONAL EXPERIENCE

Edge Energy – A Clean Energy Solutions company supporting decarbonization in residential housing

Rochester, New York

Strategy & Business Planning Associate

Sep 2025 - Apr 2026

- Engineered a 5-year financial model for a dual-sided marketplace pilot across 80+ product categories, using pricing and sensitivity analyses to inform category prioritization, breakeven timing, and executive scaling decisions from 200 to 900 homes annually.
- Architected a partnership intelligence and outreach roadmap by evaluating 103 organizations through a partner-fit scoring matrix, identifying 30 high-priority targets and building a launch-ready commercial pipeline.
- Developed an ESG impact framework mapping residential upgrade categories across 9 home-performance metrics, translating homeowner outcomes into sponsor-facing value for executive reporting, partner materials, and stakeholder alignment.

MentorX Corporation – EdTech company providing AI-powered career coaching

Rochester, New York

Strategy & Partnerships Intern

Jun 2025 - Aug 2025

- Benchmarked 10+ competitors across service portfolios and pricing models to identify market gaps, reposition the value proposition, and redesign B2B partnership strategy, increasing customer engagement by 40%.
- Identified 30 potential partners through market intelligence and KPI-based screening, reducing customer acquisition friction and expanding the commercial pipeline by 30%.

Indian Space Research Organisation – India's National Space Agency

Gadanki, India

Program Manager – Weather Data and Monitoring Program

Jul 2021 - Jun 2024

- Spearheaded deployment of an AI-driven storm nowcasting system to support government disaster response and launch-weather planning, leading a cross-functional team of 5 to deliver 97.5% model accuracy and a 5% false-alarm rate.
- Managed end-to-end validation of a multi-source forecasting pipeline, translating complex atmospheric outputs into decision-ready briefings and operating protocols that extended operational lead time 7x from 15 minutes to 2 hours.
- Secured \$1M in government funding by convening 20 organizations, preparing executive-ready materials, and aligning stakeholders around a shared data-governance and operating framework.
- Led urban climate analytics across a 5,000 sq. mile region, correlating environmental trends with urbanization patterns to inform government infrastructure strategy and drive \$500K in annual savings.

Project Manager – GPS Network Project

Aug 2017 - Jun 2021

- Directed a \$1M national GPS infrastructure program, managing milestones, vendor dependencies, and a 20-member team to deploy 25 monitoring stations across Southeast India, delivering 10% under budget with zero data loss.
- Owned vendor evaluation and procurement strategy across 20+ suppliers, using KPI-based supplier assessments, competitive bidding, and market analysis to reduce CAPEX by 11%.
- Coordinated vendor, technical, and IT teams to resolve 50% of real-time data transmission failures, redesigning data architecture with redundancy that reduced data gaps to 2%.
- Engineered Python-based data extraction and processing pipelines for real-time atmospheric data, reducing retrieval time from 24 hours to 30 minutes and improving processing efficiency by 50%.

PROJECTS

- **Thermo Fisher Scientific - Strategy Consultant:** Designed a tiered subscription and pricing strategy across licensing, renewals, and support models, translating customer value into a scalable framework projected to drive 35% CLV lift and \$14M in recurring revenue.
- **Simon Vision Consulting - Strategy Consultant:** Built a SaaS go-to-market and pricing model by synthesizing market research, customer segmentation, and competitive intelligence, defining a roadmap to capture 10% SOM penetration and support first-year revenue growth.

ADDITIONAL INFORMATION

- **Technology:** Excel, PowerPoint, SQL, Python, Tableau, Power BI, R, MATLAB, ArcGIS, Figma, LangChain, Chroma, Machine Learning
- **Skills:** Strategy & Operations, Financial Modeling, Market Research, GTM Strategy, Pricing Strategy, Competitive Benchmarking, Scenario Analysis, Sensitivity Analysis, Stakeholder Alignment, Program Management, Vendor Evaluation, Data Analytics, Forecasting
- **Publications:** 3 IEEE publications on machine learning applications for atmospheric modeling and storm prediction
